

# ● Prime Painted Finish for Steel Poles & Brackets

## Steel Poles & Brackets

At the customer's option, a pole or bracket can be field painted instead of factory painted.

### Field Painted: If poles are requested painted

- If steel poles are to be field painted we recommend shipping the products with a base prime paint finish, in order to prevent rust from forming due to contact with moisture.
- If poles are requested painted with a prime paint only finish, the pole would be a gray powder prime paint.
- If brackets are requested with a prime paint only finish, the bracket would be a red oxide wet prime paint.
